

Wrap Up: Closing Remarks

Les Stachow, NH PUC

Closing Remarks

Les Stachow

New Hampshire Public Utilities Commission

Nashua

May 8, 2018

Today we have received much food for thought, including the following:

A changing efficiency landscape, with shifting portfolios, new technologies, and more granular avoided costs

The 2018 update to AESC study has pointed to generally lower electric avoided costs

NWA's will defer investment in infrastructure but deployment of DER will take time

EM&V opportunities & challenges of control technologies

Role of TRM's in advancing efficiency and the industry

The magnitude of on going research into NEI's

The opportunities afforded by a NSPM in assessing cost effectiveness of EE resources

Need to adapt research methods for the evolving storage market

However, many EM & V challenges remain!

Using new data services effectively

Making EM & V more accessible and relevant?

Coping with present budget constraints

Maximizing opportunities afforded by EM & V 2.0

How to overcome current PUC perceptions of EM & V

Balancing the need for oversight with independence

Adapting EM & V research to the needs of Grid Mod and DER

**Thank You for your attendance and
participation today**

Many thanks to all the presenters and of course to NEEP and especially Ms. Elizabeth Titus and the NEEP team, without whom this conference would not have taken place!

Thank you for attending our Meeting

- Please complete the evaluation form – return it to NEEP table
- Leave your name tag and lanyard for recycling
- Thank you again to our sponsors!

Upcoming Events

- Action Plan to Accelerate Strategic Electrification in the Northeast (webinar), May 17 at 2:00 p.m.
- Renewable Heating & Cooling Workshop, June 18-19 in Saratoga Springs, NY
- 2018 NEEP Summit, October 2-3 in Middletown, RI
- Advanced M&V Workshop, November 2018, in Burlington, VT
