SEM is the holistic approach to managing energy use in industrial facilities in order to continuously improve energy performance and achieve energy, cost and carbon savings over the long term.

SEM focuses on business practice change from senior management through shop floor staff, improving organizational culture to reduce energy waste and improve energy productivity.

“SEM fundamentally shifts the dynamic of energy efficiency initiatives—from energy efficiency programs promoting measures to companies actively seeking further savings opportunities.”

–2015 ACEEE paper; When does Energy Management become Strategic?

SEM CORE ELEMENTS

Strategic Energy Management generally follows the Plan-Do-Check-Act model. Businesses’ level of SEM Implementation falls on a continuum, with customers ranging in both their breadth and depth of implementing core elements of SEM. Core elements include:

1. Secure Management Commitment
2. Plan for Energy Management
3. Implement Energy Management
4. Measure and Check Results
5. Review for Continual Improvement

2 - DOE’s EGuide Training Session; “The Business Case for Strategic Energy Management - Systems and Resources To Help You Get There” NEEP Workshop, November 12, 2015 Ralene Molina-Kreiser, CPEnMS, ISO 50001 Auditor
Efficiency Vermont, Bonneville Power Authority, Energy Trust of Oregon, New York State Energy and Development Authority (NYSERDA) are just a few of the energy efficiency programs offering SEM programs today.

### BENEFITS

**TO CUSTOMERS**
- Improved profits
- Reduced energy costs
- Improved processes
- Reduced emissions
- Reduced risk to energy price fluctuations
- Pursue certification designating leadership in SEM

**TO EE PROGRAMS**
- Pathway to achieve energy savings via Operations and maintenance (O&M)
- Increase capital projects
- Enhanced verification of savings
- Foster strong/enduring customer relationships
- SEM creates predictable pipeline of projects

### IMPLEMENTATION APPROACHES

- TREASURE HUNTS
- COHORTS
- ENERGY MANAGERS
- TECHNICAL ASSISTANCE

### SEM

- Energy Trust of Oregon achieved over 51 MWh and 980,000 therms of savings over 2013-15
- Bonneville Power Authority saw participating customers reduce energy around 2% the first year and 5.5% by the fourth year
- Annual costs associated with implementing Energy Trust of Oregon’s SEM programs to C&I customers have ranged from $.03/kWh to $.23/kWh depending on program maturity, but average $.06/kWh over five years

### MORE INFORMATION

DOE Online tools now available to help customers and programs adopt SEM and pursue certifications demonstrating excellence.
