

Data Analysis Work Scope

Due to uncertainty about the provider for the analysis portion of the project, NEEP is requesting a separate statement of qualifications and a budget to conduct the analysis as a separate work scope and budget. This may be submitted with the response to the rest of the RFP, provided that the personnel and budget for the analysis component are clearly differentiated from the rest of the work scope. NEEP reserves the right to award this analysis component to the same contractor that will be awarded the field testing work, or to a different contractor, to no contractor, or to issue a separate RFP for the analysis at a future date.
